I'm a Software Engineer with over 8 years of experience in Software Engineering, I specialize in a broad range of areas including Embedded Systems, Linux, Robotics, Android Development, Game Development, Database Administration, System Administration, CI/CD Automation, and Diagnostic Systems. I thrive in challenging environments, actively collaborating with cross-functional teams to optimize workfows and improve system reliability.

WORK EXPERIENCE

Senior Software Engineer at GlobalLogic Poland

Mar/2023 - Present

GlobalLogic is a digital services company providing software product design and development services. It is an independent subsidiary of Hitachi Ltd.

Responsibilities

- Worked with Jenkins to automate CI/CD pipelines, manage build processes, and integrate with various tools for testing and deployment.
- Configured Jenkins jobs, pipelines, and plugins to optimize software delivery workflows.
- Worked with the AUTOSAR Diagnostic Stack, focusing on Diagnostic Data Identifer (DID) implementations and overall diagnostic stack activities.
- Developed and confgured diagnostic services, ensuring compliance with UDS.
- Integrated diagnostic protocols, managed DTCs, and optimized ECU communication strategies for robust vehicle diagnostics.
- Worked with Robot Framework for test automation, focusing on keyword-driven testing and integration with various libraries
- Designed, implemented and fixed automated test cases for validating software functionality, ensuring reliability and efficiency in testing processes.
- Configured CI/CD pipelines to execute Robot Framework tests and generate detailed reports.
- Wrote various scripts to help improve the development process.
- Wrote a script to automate discovery, reservation and connection to remote Test Rigs.
- Wrote a VSCode extension to populate the tasks.json file with Make targets from the project, open various tools used by the project and connect to Test Rigs.
- Wrote a script to analyze map fles to verify correct Linker Sections allocation of various codes objects.
- Created an automated script to configure and use MCDS on GreenHills Multi IDE that enables monitoring OS tasks in real-time, chart them, and create a snapshot of the currently running tasks and save them for latter analysis.
- Conduct thorough and meticulous E2E FSM testing to ensure the comprehensive validation of system functionalities, adhering to industry best practices and quality standards.
- Develop precise and comprehensive test specifcations within DOORs, demonstrating a deep understanding of system architecture and test design principles.
- Execute test scenarios with a focus on precision and accuracy, navigating complex system pathways to identify and report any discrepancies while ensuring the robustness of the system.
- Analyze Problem Reports with a methodical approach, identifying root causes and implementing effective solutions to rectify issues promptly, contributing to the continuous improvement of system reliability.
- Maintain the highest standards of documentation by updating DOORs attributes in alignment with the Process Baseline, demonstrating meticulous attention to detail and adherence to organizational processes.

Senior Embedded Software Engineer at Vehiclevo Egypt

May/2022 - Mar/2023

Vehiclevo is a German automotive software company founded in 2016, specializing in intelligent software architectures for ECUs, with a focus on EVs, infotainment, and autonomous driving. It operates globally, including a development center in Egypt, and is a recognized AUTOSAR partner.

Responsibilities

- Creating simulation nodes and panels using Vector CANoe and programming them with CAPL
- Configuring Basic SW with Capital VStar (CVI)
- Configuring AUTOSAR Basic SW and Creating AUTOSAR compatible SW components and Applications
- Configuring GLIWA for multicore microcontrollers task monitoring

Embedded Software Engineer at Valeo

Oct/2018 - Apr/2022

Valeo is an automotive supplier and partner to automakers worldwide. It is a global leader in the design, production, and sale of components, integrated systems, and modules for the automotive industry.

Responsibilities

- Creating simulation nodes and panels using Vector CANoe and programming them with CAPL
- Configuring Basic SW with Vector DaVinci
- Configuring Basic SW with Elektrobit Tresos
- Configuring AUTOSAR Basic SW and Creating AUTOSAR compatible SW components and Applications
- Using IBM DOORs to read customer requirements and creating SRS, CDD and Test Documents
- Creating a variety of tools that help increase efficiency and performance of existing and new projects
- Creating Steering Wheel Switches applications
- Creating and Maintaining Capacitive Touch based solutions for different applications

Embedded Software Intern at Valeo

Mar/2018 - Jul/2022

Senior Software Engineer at KAN

Dec/2017 - Feb/2018

Responsibilities

- Developing Android Apps for various clients, managing SQL databases and creating backend servers using Java2EE and JSP

Game Developer at Hive Studio

Dec/2017 - Feb/2018

Responsibilities

- Developing various VR and AR games for various advertising purposes, using Unity3D and C#

Android Developer at AL Hadeya For Arabic Software

Dec/2017 - Feb/2018

Responsibilities

- Developing Android Apps for various clients, managing SQL databases and creating backend servers using Java2EE and JSP

PROJECTS

Hands On Detection

Creating steering wheel hands on detection using segmented ADC segments and integrating with autonomous driving and applying gesture detection with which a user can play next/previous song or increase/decrease volume.

My Second Project

Short summary about my second project

- First Highlight of Project Two
- Second Highlight of Project Two
- Third Highlight of Project Two

EDUCATION

Helwan University

Helwan, Egypt

Degrees

- Bachelor of Engineering

Sep/2012 - Sep/2017

California Polytechnic State University

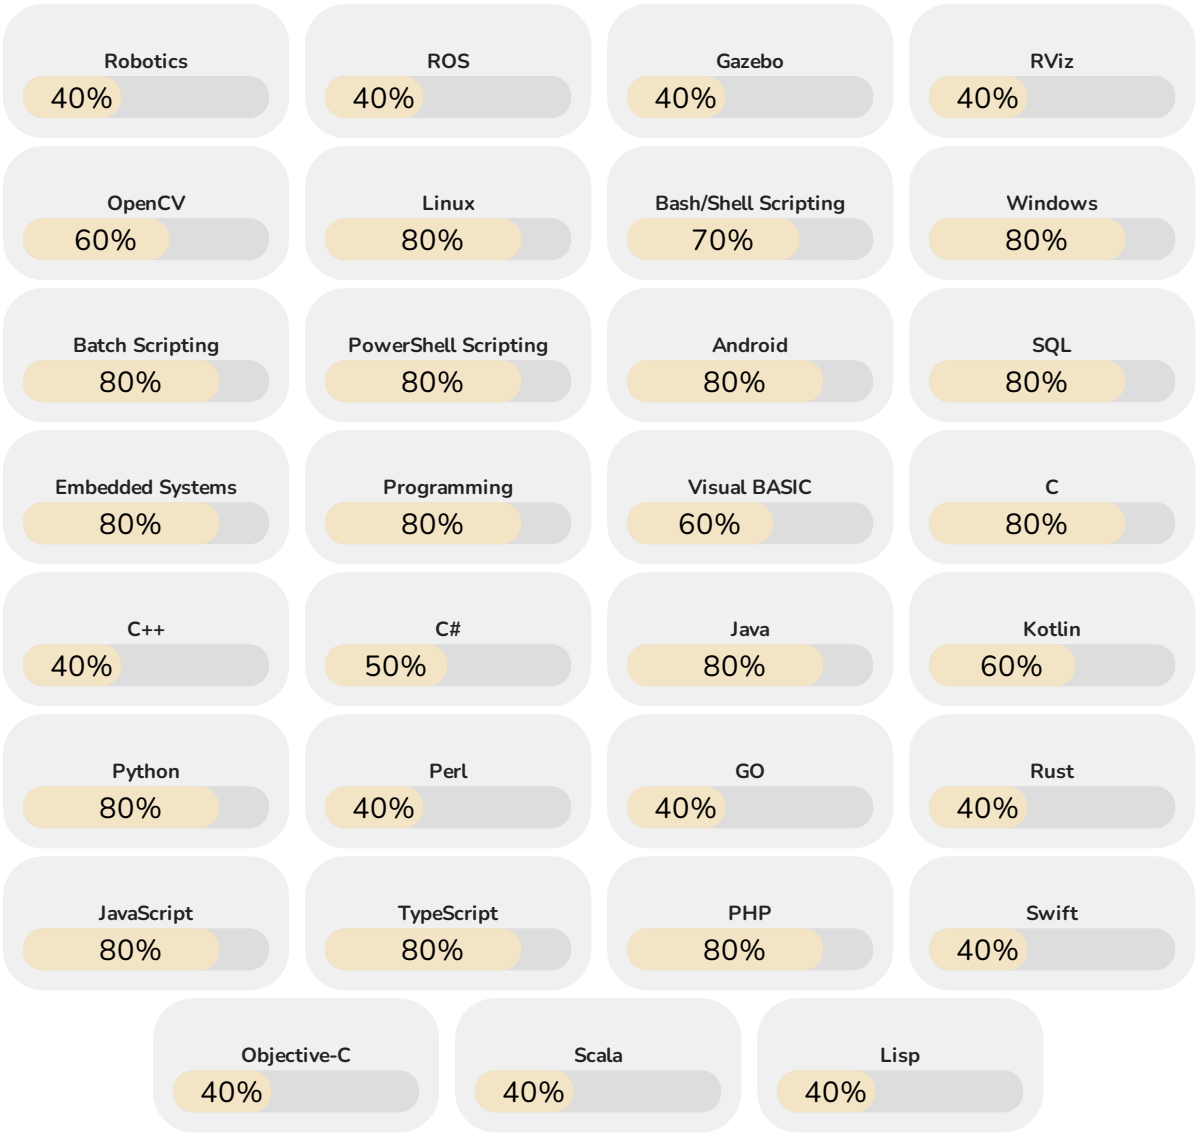

California, USA

Degrees

- Training in Robotics

Jul/2016 - Aug/2016

SKILLS

VOLUNTEER EXPERIENCE

Position One at Latest Organization

01/01/2020 - Present

Short summary about present volunteer work

- First Duty of Current Organization
- Second Duty of Current Organization
- Third Duty of Current Organization

Position Two at Previous Organization

01/01/2010 - 01/01/2020

Short summary about previous volunteer work

- First Duty of Previous Organization
- Second Duty of Previous Organization
- Third Duty of Previous Organization
